SAY ABOUT ME

"She decided, on the advice of her father, to move at the age of 18 to begin her training in the most avant-garde country in foot and ankle medicine in Europe: Spain!

On Iberian soil, she had the opportunity to compare herself with the greatest exponents in the sector; she began her university studies at the Fub University in Manresa, but after only a year, she managed to win a place at the prestigious University of Barcelona for academic merits. After graduating, she specialised in foot surgery and obtained two Master's degrees: one in minimally invasive foot surgery at the Catholic University of Valencia and one in open surgery at the University of Seville.

He began her PhD in Medicine and Translational Research at the Anatomy Department of the Faculty of Medicine of the University of Barcelona and started working as a Lecturer in Nail Surgery and Research Methodology for the University of Manresa.

However, she decides to return to Italy, her native country, to work in her family's clinics.

In Italy, she continues with her activity as a lecturer in two Master's courses: Prof. in the Master of Sport Podiatry at Pegaso University and Prof. in the Master of Rehabilitation Podiatry of Surgical Interest at La Sapienza University in Rome.

She currently divides her time between Italy and Spain, where she continues to practice both teaching and research."
